AISHWARYA ZOAD

Technical Project Manager | Technical Delivery | Enterprise Digital Platforms

Nagpur, Maharashtra, India | Open to Remote | +91-9156477357 | zoada@gmail.com | linkedin.com/in/aishwarya-zoad

PROFESSIONAL SUMMARY

Technical Project Manager with 10+ years spanning software engineering, project management and enterprise technical delivery. Leads concurrent B2B commerce and sales pricing delivery for Mohawk Industries (USA), aligning Engineering, QA, Architecture, Product, Business and client stakeholders. Combines technical fluency with delivery planning, capacity trade-offs, dependency and risk management, release governance and production incident coordination. Makes ownership and decisions explicit and translates technical constraints into practical execution.

DELIVERY SIGNATURE

Make ownership visible — Dependencies → owners → decisions → action.

Protect delivery integrity — Capacity → scope → risk → readiness.

Translate technical complexity — Engineering constraints → business decisions → controlled execution.

CORE COMPETENCIES

DELIVERY & GOVERNANCE: Technical Project Management · End-to-End Delivery · Agile / Scrum · SDLC · Sprint Planning and Execution · Delivery Governance · Release Management · Scope & Prioritization · Backlog Prioritization

LEADERSHIP & EXECUTION: Client & Stakeholder Management · Cross-functional Leadership · Capacity & Resource Planning · Effort Estimation · Risk, Issue & Dependency Management · Decision & Escalation Management · Executive Reporting · Business–IT Alignment

RELEASE & OPERATIONAL MANAGEMENT: Governance · UAT & Production Readiness · Go/No-Go Coordination · Production Validation · Incident & Change Management · CCB/CAB · Rollback Readiness · Service Transition & Knowledge Transfer

CONTINUOUS IMPROVEMENT & TOOLS: Governance · UAT & Production Readiness · Go/No-Go Coordination · Production Validation · Incident & Change Management · CCB/CAB · Rollback Readiness · Service Transition & Knowledge Transfer

PROFESSIONAL EXPERIENCE

UMM DIGITAL | Client: Mohawk Industries (USA)

Technical Project Manager - Xchange & Sales Pricing | Mar 2026 – Present | Remote, India

Delivery scope: Two concurrent platforms — B2B digital commerce (Xchange) and sales pricing (PriceFX) — spanning Engineering, QA, Architecture, Product, Business Analysts and US client stakeholders.

- Own delivery across two concurrent platforms, converting business priorities into executable scope and aligning estimates, dependencies, risks, UAT, releases and production readiness across technical and business teams.
- Coordinate Xchange across five Technical Leads and their development teams, and PriceFX across seven Developers, four QA, one BA and one Product Owner; align priorities and cross-system dependencies.
- Assess feasibility through effort-estimation discussions, resource recommendations and scope-versus-capacity trade-offs, surfacing technical constraints before commitments are finalized.
- Tracked 65 Story Points across 22 CX work items; 77% of committed work had progressed through development, UAT, QA or approval at the reporting checkpoint.
- Directed coordination of an approximately 34-ticket Multi-LTP production pricing release through UAT, business approvals, deployment sequencing, production validation and Go/No-Go readiness.
- Coordinated escalation of a production deployment failure involving GCP Cloud Build and Bitbucket, linking the integration issue to production impact, technical ownership and contingency planning.
- Led delivery coordination for PriceFX OPE validation, scaling test volume from 34 to 118 to 124 records to examine synchronization and table-locking risks and inform readiness decisions.

Assistant Technical Project Manager — CX/Xchange | Dec 2025 – Feb 2026 | Remote, India

Client: Mohawk Industries (USA) | B2B commerce platform (Xchange)

- Managed Xchange sprint planning, execution, dependency resolution, UAT, release coordination and stakeholder communication across Engineering, QA, Product and Technical Leads.
- Introduced clearer delivery controls for ownership, dependencies, readiness and escalation to strengthen accountability and reduce reactive execution.

PROFESSIONAL EXPERIENCE — CONTINUED

GREAT PLACE IT SERVICES (GPIT) | Client: Great Place to Work®

Enterprise Workplace Analytics & Survey Platforms | International Delivery: India, Peru, Japan & Sri Lanka; Survey Data Migration & Ranking Support: India, Spain, UAE, Chile & Gulf countries

Project Manager | Dec 2022 – Nov 2025 | India

- Owned product-platform delivery from requirements and estimation through Agile execution, release and post-production support across Development, QA, Business Analysts, Product and client stakeholders.
- Raised delivery predictability from 78% to 93% within 12 months by strengthening requirements analysis, work-breakdown estimation, client sign-off and release controls.
- Reduced unplanned work from multiple occurrences per week to approximately once per sprint through scope-, priority- and capacity-based intake with RICE prioritization.
- Managed and mentored two Developers and one QA as direct reports, covering delivery oversight, coaching, performance reviews and conflict resolution.
- Enabled three developers to adopt AI-assisted workflows; during the same period, sprint capacity increased from approximately 20 to 80 Story Points as delivery practices and team capability matured.
- Led feasibility and effort discussions across business stakeholders, developers and architects, converting requirements and technical constraints into executable scope.

Technical Project Coordinator | Jan 2020 – Nov 2022 | Remote, India

- Expanded from development into requirements, delivery coordination, stakeholder communication, documentation and release management; improved delivery predictability from 72% to 88%.
- Standardized documentation and approval practices, reducing rework by approximately 20% and strengthening delivery visibility and escalation.
- Coordinated India List Portal registration and survey-driven certification delivery for 800+ companies across four to five countries.

Senior Software Developer | Sep 2016 – Dec 2019 | Nagpur, India

- Built backend and application functionality using CakePHP, Laravel, MySQL, REST APIs, HTML/CSS and jQuery for AWS-hosted digital platforms.
- Progressed into requirements analysis, stakeholder coordination and release support, building the engineering foundation for technical delivery leadership.

TOOLS & TECHNICAL EXPOSURE

Delivery & Collaboration: Jira · Jira Service Management · Confluence · ScriptRunner · Power BI
Engineering: MySQL · REST APIs · AWS Console · EC2 · Bitbucket · Laravel · CakePHP · HTML/CSS · jQuery
Enterprise Platforms / Delivery Exposure: SAP Commerce / Hybris · PriceFX · PIM · Bloomreach · SAP S/4HANA · Middleware · GCP · Azure
AI & Productivity: AI-assisted development and analysis · Make · Canva

EDUCATION

Bachelor of Engineering — Computer Science & Engineering
Rajiv Gandhi College of Engineering & Research, Nagpur | 2012–2016

CERTIFICATIONS

- PMI Kickoff — Predictive & Agile (2025)
- Kanban Essentials with AI (2025)
- Scrum Fundamentals Certified (2025)
- Lean Six Sigma Yellow Belt with AI (2024)
- People Manager — Great Place to Work®
